**Summary of reasons  
for classification:**

The computer image file printout *0209144135[1].jpg* is classified as:  
Objectionable.

The publication is objectionable because it promotes and supports the use of urine in association with sexual conduct.

The printed image depicts the sexual practice of urolagnia. The image is intended for the sexual titillation of adult viewers and its file format makes it suitable for wide distribution and trading. Depictions of the use of urine in a sexual situation validate the idea that urolagnia is a desirable sexual practice and encourage viewers to experiment with the use of urine in association with sexual conduct.

The classification of this publication interferes with the right to freedom of expression set out in the New Zealand Bill of Rights Act 1990. However, this is an outcome that is consistent with Parliament's intention that publications that promote and support the use of urine in association with sexual conduct are deemed to be objectionable.
